Answer or make phone calls through your main unit when connected to your cellphone via bluetooth. \*Distance : 10m~30m

Two way communication distance at 1 mile (1.6km). Real time live communication.

## **SAFETY**

The person you are talking to can warn you about any potential danger. You are connected in real time being able to provide instant instruction to the student.

## FUN

It is so much fun when talking to another person while performing your sport, you can talk about anything!

#### **PROGRESSION**

Provides real time coaching which increases the learning curve for instant .

# NOTICE

**BBT is NOT PUSH TO TALK or a WALKIE-TALKIE!** 

After pairing BBT, just mount it onto your helmet or hat, then plug and screw the microphone in. You can then start to a real time, hands-free conversation.

## Mount position (Choice of Head or Arm)

You can mount your main unit either on your head or arm. To optimize distance, a higher position for your main unit is recommended.

\* Obstacles will cause interference , you must have line of sight

Bluetooth will not go through water, waves, trees, and or any other obstacle .

\*Coach should stay in a position higher than any obstacle .

## Waterproof IPX7

Immerse in water for 30 minutes at a depth of 1 meter. \*Must be in the waterproof case !

000

## **Cold-Resistant**

Great for snow sports with exceptional resistance to cold conditions. Use it with your friends or coach on the mountain.

## Wind cancel

BBT has an excellent wind/noise cancellation.

## Working time

12hr continue use time.
